% Promo Transactions

Average of Amount by Promotion_Applied

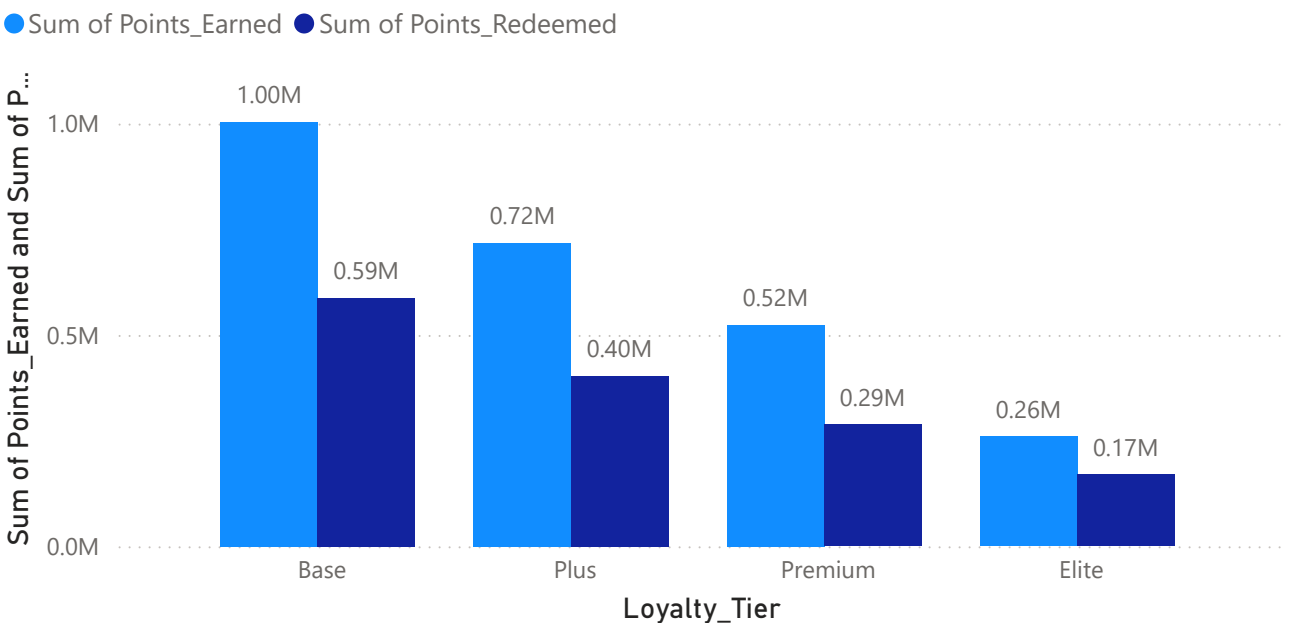

Churn Rate by Loyalty_Tier

Final Recommendations:

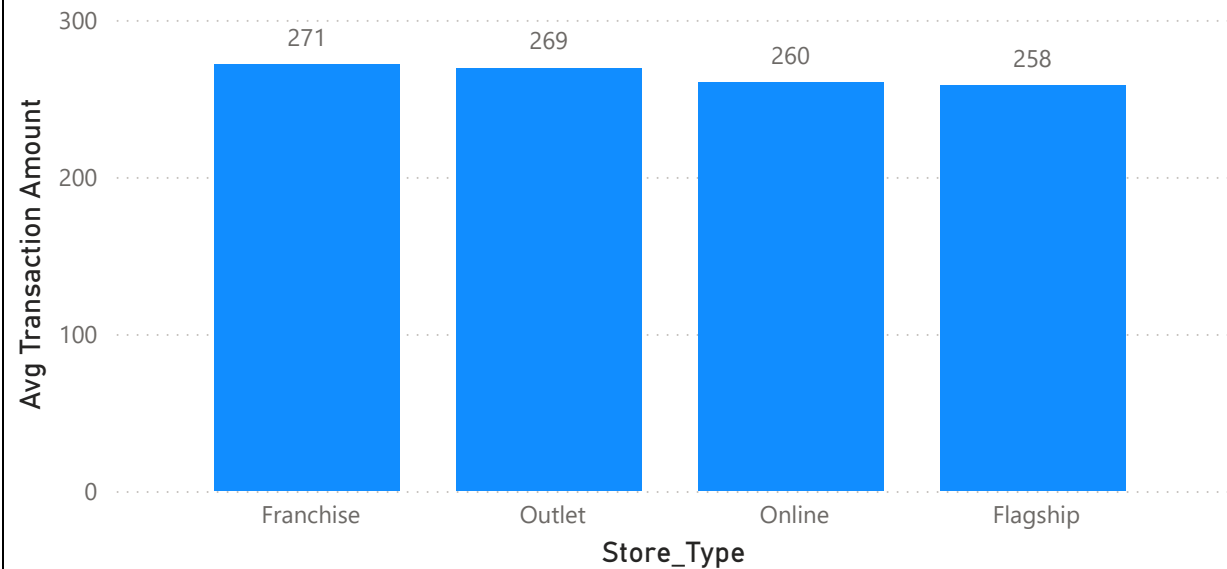

- **Improve retention of valuable customers:** Elite customers have the highest churn, which is not expected. The company should give them special rewards, personalized offers, and better service to keep them engaged.
- **Use promotions in a smarter way:** Promotions increase the average purchase value and are used in many transactions. Instead of giving discounts to everyone, the company should target the right customers with personalized offers.
- **Increase purchase frequency:** Some customer groups and regions buy more often than others. The company should encourage repeat purchases by giving loyalty benefits, reminders, and special deals.
- **Focus on high-performing segments:** Younger customers (18–24, 35–44) and regions like Europe and Asia-Pacific show higher activity. The company should focus more marketing and campaigns on these groups.
- **Improve underperforming segments:** Regions like North America and categories like Apparel are performing lower. The company should improve marketing, product visibility, and offers in these areas.

Top 3 recommendations for Adidas:

1. Focus on retaining high-value customers, as they contribute the most revenue.
2. Strengthen engagement strategies for repeat customers to improve loyalty.
3. Analyze churn reasons and address key issues to reduce customer loss.
